

### **LEARNING HOW TO MAKE LOGICAL PLANS**

We use the TOC tools with our children, ages 4-7 at Alderman Pounder Infant School. We have used the "Ambitious Target" tool with the children to get them to think through how to plan events--parties, field trips, etc. Sometimes we relate the planning tool to current events such as this one on Wedding Plans just prior to Prince Edward's wedding. On the left side of the page are the obstacles to the target. On the right side are the children's ideas to overcome the obstacles.
